

The Biggest

Some animals in Africa were talking together.

"I'm big," said the lion.

"I'm bigger than you are," said the rhino.

"That's true, a rhino is bigger than a lion," said the elephant. "But I'm the biggest animal in Africa."

"Yes indeed! You are the biggest animal anywhere on land across the whole world," said the tiny spider.

"Isn't the elephant the biggest living animal on earth?" asked the hippo.

"Nope, the biggest animal is the blue whale," replied the spider. "The blue whale doesn't live on land. It lives in the ocean."
